

Gap Explanation Letter

My name is Yash Kumar. I was born on 15th October 1999 and currently hold an Indian passport with passport number **X6652249**. I am currently residing in Delhi, India.

I am writing to provide an explanation for the period of time in my professional record that follows the completion of my Graduation in Nursing in 2022. After that, I have been preparing for an entrance exam NORCET along with my involvement in researching universities for Overseas Education in Australia, followed by dedicated preparation for the PTE exam.

Throughout this phase, I had to prioritize my career aspirations, which necessitated a temporary pause in my professional pursuits. While this decision presented its challenges, I had to set aside all other commitments and concentrate on making the right choices that would shape my future.

I am aware that the interruption in my academic performance might raise concerns, but I sincerely hope that you can understand the circumstances that led to this absence. At present, I am enthusiastic and fully dedicated to pursuing my educational goals. I possess the resilience, determination, and commitment required to excel in your Master's program.

Name: Yash Kumar
